without harming them

Our products
**DO NOT
KILL,
anything!**

750ml e CONCENTRATE - treats up to 2000m²

Grazers G1 Concentrate

Effective against foliar damage
from rabbits, pigeons and deer

Contents: specific calcium chloride
solution.

Dilution: 4 capfuls (60ml) in 5 litres of
water (3 teaspoons per litre).

**In areas of high pest numbers it is safe to
double the application rate and increase
frequency.**

Spray interval: 4 weeks or less e.g. in
situations where treated grass is mown,
plants are watered or periods of
prolonged heavy rainfall follows spraying,
repeat applications may be needed
sooner.

**New plants are especially vulnerable to
damage.** Spray at least twice prior to
planting (allow leaf to dry between
sprays). Spray again once planted. Avoid
spraying in bright sunlight.

Shake vigorously before use. Spray
foliage (using a fine spray) on any plants
while dry, where damage has occurred or
is at risk. Spray foliage until just wet.

Note: It is advisable to add a small
amount of washing up liquid (eg. 1 drop
per litre).

Harvest interval: For edible crops we
recommend one weeks interval between
final treatment & harvest.

Storage: Will keep for 2 years when
stored in cool, dark conditions.

**Grazers is very safe to use and benefits
the plant.**

Allow leaf to dry before applying other
products.

GRAZERS G1 rabbit, pigeon, deer concentrate

Warning: Causes serious eye irritation
If medical advice is needed,
have product container or
label to hand. Keep out
of the reach of children.

Wear protective gloves/
eye protection. **IF IN EYES:**
Rinse cautiously with water
for several minutes. Remove contact
lenses, if present and easy to do.
Continue rinsing. If eye irritation
persists: Get medical advice/attention.
Read the label before use.
