Harm,
anything!**

375ml e Grazers G1 Concentrate
Dilutes to make 30 litres of Ready To Use

Grazers G1 Concentrate

EFFECTIVE AGAINST DAMAGE EXPECTED
FROM RABBITS, PIGEONS AND DEER
+ geese, mice, voles & squirrels

Shake vigorously before dilution

Dilution: 4 capfuls (60ml) in 5 litres water (= 12ml, or 3 teaspoons, per litre and for refilling G1 RTU). Dose rate can be increased to double this strength, if pest numbers high. It is advisable to add a small amount of washing up liquid (eg. 1 drop per litre).

[NB: Never apply undiluted product to plants]

Application Directions (once diluted):

- Apply every 3 - 5 weeks* prior or at the first sign of damage, to reduce further attack
- Apply light covering to dry leaves, up to leaf run off, avoiding direct sunlight and freezing conditions
- Safe to spray from early growth stage (allow transplants 5 days before spraying).
- Before using left-over product, shake it well again

*It is advised (and safe) to spray more frequently (every 7-10 days) if pest numbers are high, plants growing rapidly or with prolonged rainfall or overhead watering. Additionally, deer are more indiscriminate feeders, so extra applications are required initially.

RECOMMENDATIONS: For new plants, spray twice or more 24-48 hours before planting out, then again a few days after, though not within 5 days when transplanting from greenhouse production.

Allow foliage to dry before applying other sprays.
Standard harvest interval advice: Leave 1 week after last application.

GRAZERS products also strengthen and stimulate your plants for robust growth. No harm to pests.

CONTENTS: Grazers contains a specific calcium solution, with plant extracts and adjuvants in a concentrate form that must be diluted. Can keep for 2 years when stored in cool, dark conditions.
Grazers products do not contain any animal by-products.

GRAZERS G1 rabbit, pigeon, deer concentrate

Warning: Causes serious eye
irritation

If medical advice is needed, have product container or label to hand. Keep out of the reach of children. Wear protective gloves/eye protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Read the label
before use.
